Default investment strategy

Sanlam Lifestage

Sanlam Lifestage

Mandate description

Sanlam Lifestage is the Fund's trustee approved default investment strategy and aims to meet each member's savings requirement by working towards a target date, which would be the Normal Retirement Age or the Planned Retirement Age (if different).

How Sanlam Lifestage works

The investment strategy consists of two phases and members are automatically switched from one phase to another as they near retirement. The two phases are:

- Accumulation phase
- Preservation phase

As retirement approaches, this target date strategy invests in an investment portfolio matching the member's postretirement needs or plans, but in the years prior to this greater emphasis is placed on achieving capital growth. Members with more than 6 years before reaching their Normal Retirement Age or Planned Retirement Age (if different) are fully invested in the Sanlam Lifestage Accumulation Portfolio which aims to achieve capital growth. Six years (72 months) before a member reaches his/her Normal Retirement Age or Planned Retirement Age (if different), the member is gradually switched from the Sanlam Lifestage Accumulation Portfolio to his/her selected Sanlam Lifestage preservation portfolio by means of 50 monthly switches.

Members with more than 6 years before reaching their Planned Retirement Age are fully invested in Sanlam Lifestage Accumulation Portfolio which aims to achieve capital growth.

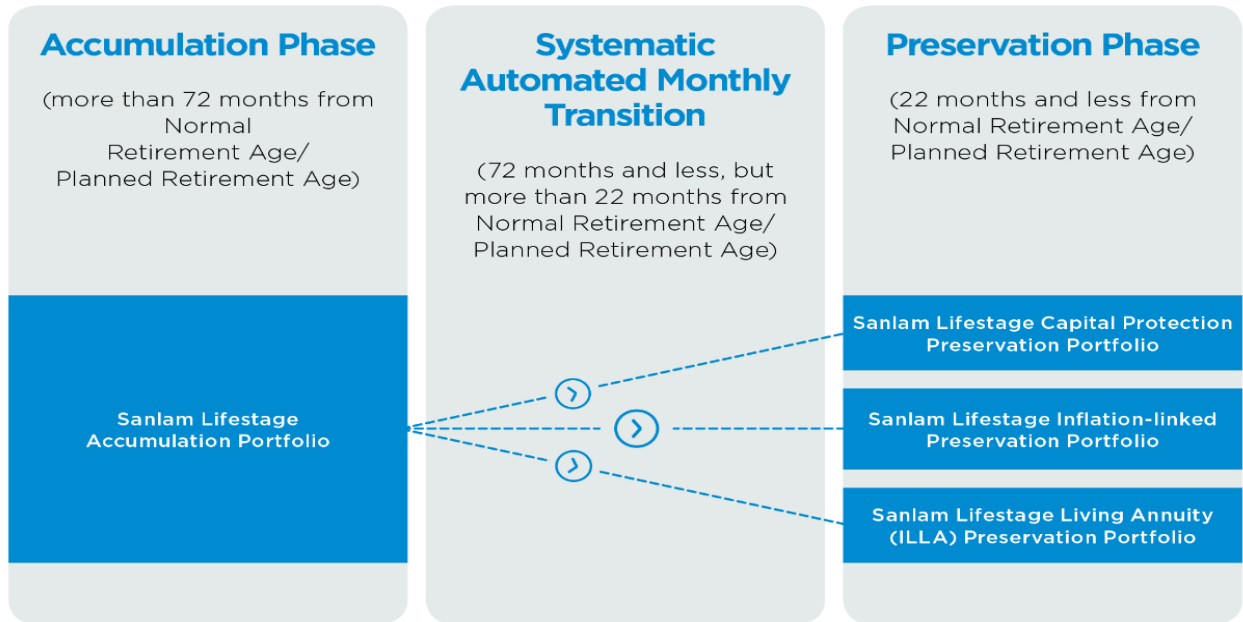

Six years (72 months) before a member reaches his/her Planned Retirement Age, the member is gradually switched from the Sanlam Lifestage Accumulation Portfolio to his/her selected Sanlam Lifestage preservation portfolio by means of 50 monthly switches.

Alternate default investment strategy

Volatility Protection Strategy

Volatility Protection Strategy

Mandate description

The trustees have approved an alternative default investment strategy suitable for members who wish to achieve inflation beating real returns over the medium to long term, but who are particularly concerned about protecting against significant short term investment losses. The strategy will most likely result in lower returns than the Sanlam Lifestage over the long term as a consequence of the implicit cost of the underlying guarantees and lower effective equity exposure. Nonetheless, the trustees recognise that such a strategy is suitable for many members – particularly those members who are not financially sophisticated and who might not appreciate that a high equity exposure inevitably implies some risk of capital loss over the short-term.

The trustees have agreed the following objectives for the Volatility Protection Strategy:

- An investment return of CPI + 3% net of fees over any 3 year rolling period (i.e. long term, inflation-beating returns);
- Aim to prevent capital loss not greater than 10% in any 12 month rolling period or 5% in any one month (i.e. protection against significant short term losses);
- "Volatility Protection" does not necessarily imply a 100% capital guarantee (however still structured to protect assets against significant losses).

The trustees review the investment strategy of the Volatility Protection Strategy continually, and will make periodic changes to the underlying investments in line with the objectives of the strategy. The Volatility Protection Strategy has historically invested contributions in the Sanlam Monthly Bonus Fund, but in early 2017 has commenced the process of investing new cash flows in the Satrix (SWIX) Balanced Tracker Fund with the intention that over time the Volatility Protection Strategy will be invested 75% in the Sanlam Monthly Bonus Fund and 25% in the Satrix (SWIX) Balanced Tracker Fund.

Satrix (SWIX) Balanced Tracker Fund

Period Ending 28-Feb-17
Fund Size R 626 million
Inception Date Sep-08

Fund objective

The portfolio invests in tracker equity and bond indices, locally and abroad, and also cash to create a moderate risk balanced portfolio which is expected to perform close to the underlying indices without incurring active management costs. Scrip lending may be performed on the passive equity component.

Risk Profile

This fund has a moderate-aggressive risk profile

Fees

On South African assets:

0.38% per annum

On International assets:

0.30% per annum on international equities, and

0.25% per annum on international interest bearing assets

The domestic equity component tracks the SWIX Index. Scrip lending is permitted in respect of this basket of shares, and the resultant income (net of associated costs) is periodically rebated to clients participating in this portfolio, and effectively serves to serve to reduce the quoted management fee.

3rd Alternate default investment strategy

Sanlam Blue Lifestage Strategy

Sanlam Blue Lifestage Strategy

Mandate description

The core objective of this alternative default investment strategy aims to meet each member's savings requirement by working towards a target date, which would be the Normal Retirement.

How the Sanlam Blue Lifestage Strategy works

The investment strategy consists of two phases and members are automatically switched from one phase to another as they near retirement. The two phases are:

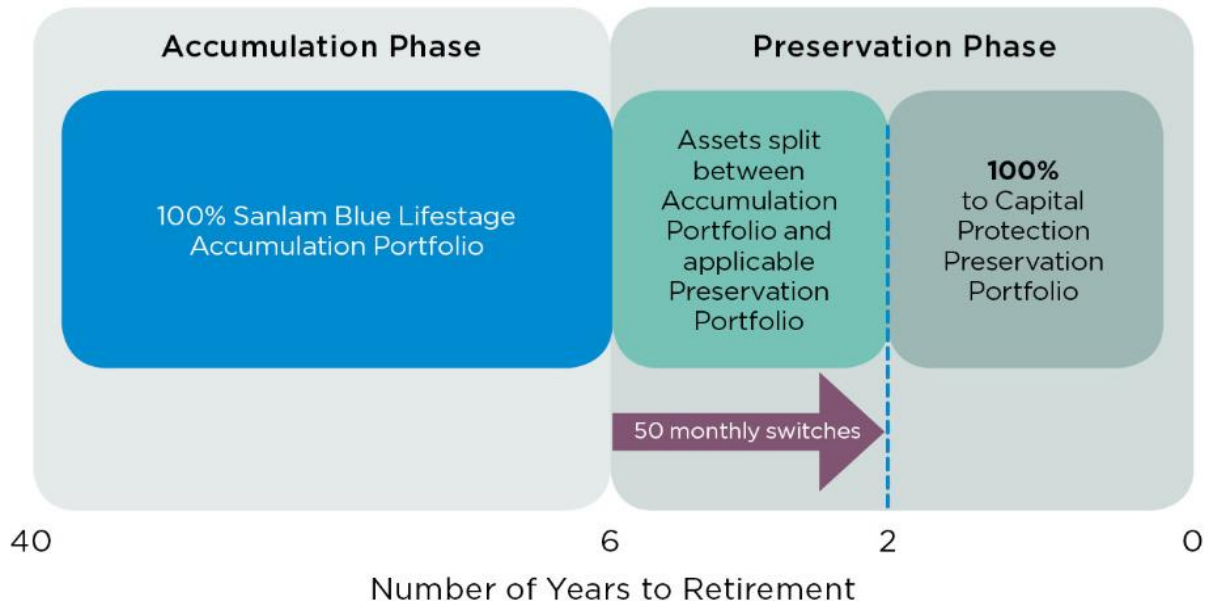

- Accumulation phase
- Preservation phase

As retirement approaches, this target date strategy invests in an investment portfolio that provides inflation beating returns with a 100% guarantee on the capital invested, but in the years prior to this greater emphasis is placed on achieving capital growth. Members with more than 6 years before reaching their Normal Retirement Age or Planned Retirement Age (if different) are fully invested in the Sanlam Blue Lifestage Accumulation Portfolio which aims to achieve capital growth. Six years (72 months) before a member reaches his/her Normal Retirement Age or Planned Retirement Age (if different), the member is gradually switched from the Sanlam Blue Lifestage Accumulation Portfolio to the Capital Protection Preservation Portfolio by means of 50 monthly switches.

The Sanlam Blue Lifestage Accumulation Portfolio invests in the SIM Balanced Fund.

Satrix (SWIX) Balanced Tracker Fund

Period Ending 28-Feb-17
Fund Size R 626 million
Inception Date Sep-08

Fund objective

The portfolio invests in tracker equity and bond indices, locally and abroad, and also cash to create a moderate risk balanced portfolio which is expected to perform close to the underlying indices without incurring active management costs. Scrip lending may be performed on the passive equity component.

Risk profile

This fund has a moderate-aggressive risk profile.

Fees

South African assets:

0.38% per annum

International assets:

0.30% p.a. on international equities

0.25% p.a. on international interest bearing assets

The domestic equity component tracks the SWIX Index. Script lending is permitted in respect of this basket of shares, and the resultant income (net of associated costs) is periodically rebated to clients participating in this portfolio, and effectively serves to reduce the quoted management fee.
