Sanlam Unity Umbrella Fund

Mandate description

Sanlam Unity Umbrella Fund (known as "The Fund") aims to achieve good investment growth at an acceptable level of risk. The Fund is designed for members with low tolerance for negative annualised returns and consists of an allocation to a volatility protection strategy and a low cost tracker solution.

This Fund currently utilises two underlying investment portfolios in order to achieve their objectives. Members invested in The Fund's assets are split as follows:
 - 75% Sanlam Monthly Bonus and
 - 25% Satrix Enhanced Balanced Tracker Fund

The approximate 75 / 25 investment split between the Sanlam Monthly Bonus Fund and the Satrix Enhanced Balanced Tracker Fund positions the Fund well to satisfy members' reasonable long-term benefit expectations, by providing relatively stable yet market-related exposure to the investment markets. The (near) uncorrelated returns of the two separate portfolios add to the reduction of risk (specific risk) through diversification.
