Fund Analysis (Conservative Global Multi-Asset Class)	7
Fund Analysis (Moderate Global Multi-Asset Class)	8
Fund Analysis (Aggressive Global Multi-Asset Class)	9
Fee Breakdown	10

Investment Strategy

The trustees take responsibility to ensure that the fund offers an appropriate range of investment choice options. Under the Sanlam Umbrella Fund, employers can choose to participate in a pension fund or a provident fund and can choose from a number of investment structures.

- The **Standard Option**: all members' are invested in the employer selected default investment strategy, i.e. no member investment choice is available. A choice of four default strategies are available.
- The **Optimal Option**: members are invested in the Sanlam Blue Lifestage Strategy. Conservative members have the option to opt out and invest in the Sanlam Monthly Bonus Fund. Qualifying members have access to more than 1 000 retail collective investment schemes available on Sanlam's Glacier Retirement Fund Solution. Members can also choose to invest the equity component in their own share portfolio.
- The **Comprehensive Option**: members are invested in the employer selected default (a choice of four default strategies are available). Members can choose a tailored investment strategy that suits their personal needs, selecting from the 4 trustee approved default investment strategies, a range of institutionally priced investment portfolios, including passive, smoothed bonus, multi-managed, absolute return and single manager balanced funds. Qualifying members have access to more than 1 000 retail collective investment schemes available on Sanlam's Glacier Retirement Fund Solution. Members can also choose to invest the equity component in their own share portfolio.

The Trustees have approved four default investment strategies to choose from for the Standard & Comprehensive Options, which are selected at participating employer level depending upon the investment objectives of the employer's members.

- **Sanlam Lifestage** aims over the long term to maximize retiring members' post-retirement income within acceptable risk levels as they approach retirement. The accumulation phase is a multi-managed strategy combining the best of both a passive and active management style. Also unique to Sanlam Lifestage is its ability to match the member's pre-retirement investment strategy to what the member intends on doing post their retirement date
- **Volatility Protection Strategy** is suitable for members who wish to achieve inflation-beating real returns over the medium to long term, but who are concerned about protecting against significant short term investment losses.
- **Passive Lifestage Strategy** is suitable for members who aim to contain investment management costs by choosing a passive investment management strategy tracking market indices.
- **Sanlam Blue Lifestage Strategy** invests in a "Best of Sanlam" lifestage model and aims over the long term to provide strong inflation-beating returns whilst offering capital protection as members approach retirement. This is also the only default investment strategy available on the Optimal Option.

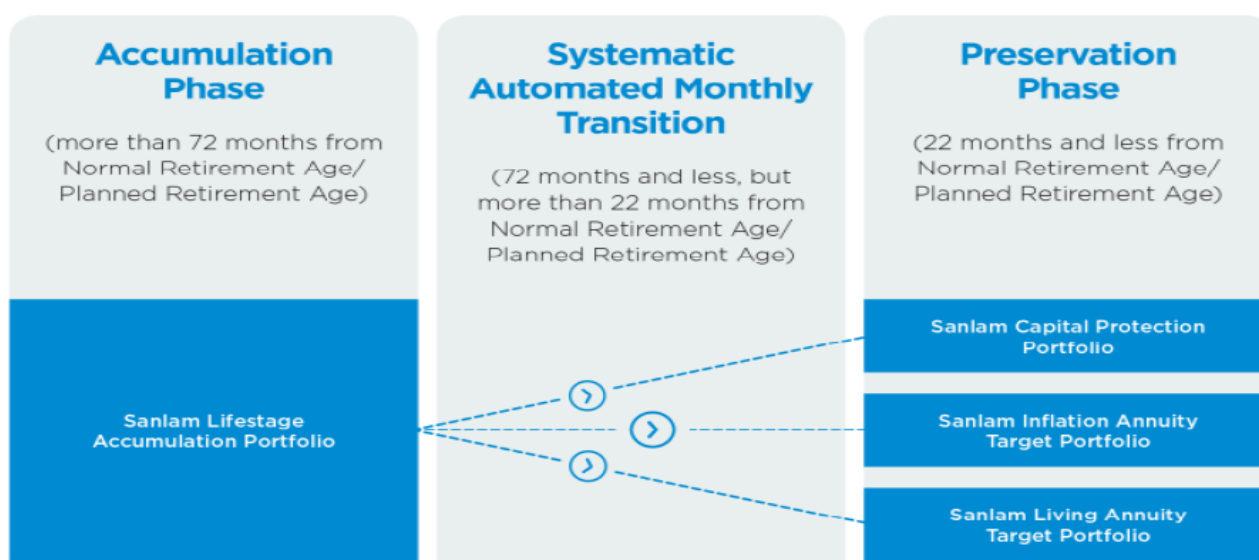

The performance of the portfolios selected will directly affect member's eventual retirement benefit. The trustees regularly monitor the investment strategy and the investment choices on offer to ensure their appropriateness. A key part of this process is monitoring the performance of the portfolios selected and comparing it to the agreed investment benchmarks. The trustees appointed Simeka Consultants & Actuaries as investment consultants to assist them to monitor and manage the Funds' investments.

The role of the Joint Forum

Each participating employer is required to establish and maintain a Joint Forum. This is a representative forum with equal representation by member and employer representatives where retirement fund benefits are considered and agreed upon. This forum therefore ensures member participation in the decision making and monitoring processes. One of the most important roles of the Joint Forum is to consider the appropriateness and performance of the default strategy as selected. Note that the employer technically remains the contracting party who acts on the decisions taken at the Joint Forum.

The Fund's default investment strategies

Sanlam Lifestage Strategy

Summary of Returns

	MRQ	1 Year	3 Years	5 Years	7 Years
Sanlam Accumulation Portfolio	1.8%	19.7%	8.0%	7.0%	7.2%
Sanlam Capital Protection Portfolio*	1.8%	7.4%	6.8%	7.4%	8.6%
Sanlam Inflation Annuity Target Portfolio	3.0%	15.1%	4.9%	2.9%	4.0%
Sanlam Living Annuity Target Portfolio	2.5%	17.2%	8.0%	7.2%	7.7%

Volatility Protection Strategy

The trustees have agreed the following objectives for the Volatility Protection Strategy:

- An investment return of CPI + 3% net of fees over any 3 year rolling period (i.e. long term, inflation-beating returns);
- Aim to prevent capital loss not greater than 10% in any 12 month rolling period or 5% in any one month (i.e. protection against significant short term losses);
- "Volatility Protection" does not necessarily imply a 100% capital guarantee (however still structured to protect assets against significant losses).

The trustees review the investment strategy of the Volatility Protection Strategy continually, and will make periodic changes to the underlying investments in line with the objectives of the strategy. The Volatility Protection Strategy has historically invested contributions in the Sanlam Monthly Bonus Fund, but in early 2017 has commenced the process of investing new cash flows in the Satrix (SWIX) Balanced Tracker Fund with the intention that over time the Volatility Protection Strategy will be invested 75% in the Sanlam Monthly Bonus Fund and 25% in the Satrix (SWIX) Balanced Tracker Fund.

Summary of Returns

	MRQ	1 Year	3 Years	5 Years	7 Years
Satrix Enhanced Balanced Tracker	3.0%	21.8%	7.8%	7.1%	8.0%
Sanlam Monthly Bonus Portfolio	1.8%	7.0%	6.3%	6.8%	8.2%

The Fund's default investment strategies

Passive Lifestage Strategy

Summary of Returns

	MRQ	1 Year	3 Years	5 Years	7 Years
Satrix Enhanced Balanced Tracker	3.0%	21.8%	7.8%	7.1%	8.0%
Sanlam Capital Protection Portfolio*	1.8%	7.4%	6.8%	7.4%	8.6%

Sanlam Blue Lifestage Strategy

Summary of Returns

	MRQ	1 Year	3 Years	5 Years	7 Years
SIM Balanced	1.6%	13.7%	5.9%	6.1%	6.3%
SPW Balanced Fund	1.2%	12.9%	7.4%	7.5%	7.5%
Sanlam Capital Protection Portfolio*	1.8%	7.4%	6.8%	7.4%	8.6%

Please note:

- Investment returns for the Lifestage Programme are quoted gross of investment management fees but net of performance fees.
- For the Smooth Bonus range, the bonuses declared are gross of investment management fees, but net of guarantee charges and performance fees.
- Investment returns for periods greater than 12 months are annualized.

NOTES:

- The values above are estimated over a rolling 3 year period and annualized unless otherwise stated.
- Figures as at December 2020
- The highest fee tier (i.e. lowest asset size) is assumed in the TERS.
- Portfolios that are less than 6 months old, may not have underlying data available to calculate a reliable estimate.
- Where applicable asset consulting fees must still be added.
- TER Includes an investment administration charge of 0.173% (including VAT) for portfolios not wrapped in a Sanlam policy.
- Estimated assuming 75% in Monthly Bonus Fund and 25% in Satrix Enhanced Balanced Tracker Fund.
- The Orbis fees are included in the total TER and will no longer be disclosed separately under performance fees.
- Calculated over a 1 year period.
- Only available to clients with existing exposure
- Estimated assuming 75% in SIM Balanced Fund and 25% in SPW Balanced Fund.

*Applicable to Clients invested before March 2015

**Averaged as Pension and Provident Fund figures differ slightly
