8.	Fund Analysis (Aggressive Global Multi-Asset Class).....	9
9.	Fee Breakdown.....	10

Background and Overview of the Fund

Investment Strategy

The trustees take responsibility to ensure that the fund offers an appropriate range of investment choice options. Under the Sanlam Umbrella Fund, employers can choose to participate in a pension fund or provident fund and can choose from a number of investment structures.

- **The Standard Option:** all members' are invested in the employer selected default investment strategy, i.e. no member investment choice is available. A choice of four default strategies are available.
- **The Optimal Option:** members are invested in the Sanlam Blue Lifestage Strategy. Conservative members have the option to opt out and invest in the Sanlam Monthly Bonus Fund. Qualifying members have access to more than 1 000 retail collective investment schemes available on Sanlam's Glacier Retirement Fund Solution. Members can also choose to invest the equity component in their own share portfolio.
- **The Comprehensive Option:** members are invested in the employer selected default (a choice of four default strategies are available). Members can choose a tailored investment strategy that suits their personal needs, selecting from the 4 trustee approved default investment strategies, a range of institutionally priced investment portfolios, including passive, smoothed bonus, multi-managed, absolute return and single manager balanced funds. Qualifying members have access to more than 1 000 retail collective investment schemes available on Sanlam's Glacier Retirement Fund Solution. Members can also choose to invest the equity component in their own share portfolio.

The Fund has provided two different categories of default strategies:

1. Lifestage Strategies:

- **Sanlam Accumulation Lifestage Strategy** - The Sanlam Accumulation Portfolio aims to provide market-related growth to members who are more than six years from retirement and who need to grow their retirement savings. The core is a low cost index-tracking strategy, around which satellite managers aim for active returns through the outperformance of their respective benchmarks. The portfolio has an aggressive risk profile.
- **Sanlam Passive Lifestage Strategy** - The portfolio's objective is to provide high long-term investment growth. Tactical asset allocation is also employed to enhance the performance of the fund relative to the performance of its benchmark. The portfolio has an aggressive risk profile.
- **Sanlam Blue Lifestage Strategy** - The Sanlam Blue Lifestage Accumulation Portfolio aims to invest 50% in SIM Balanced Fund and 50% in SPW Balanced Fund. The portfolio is suitable for investors requiring capital growth via a moderate-aggressive risk balanced portfolio.
- **Sanlam Wealth Creation Lifestage Strategy** - To deliver superior real returns over the long term. This balanced portfolio is managed in a multi-manager basis and includes international exposure. Each manager has been selected on the basis of rigorous qualitative and quantitative analysis. The underlying managers of the portfolio have been selected, mandated, monitored and reviewed by a Joint Investment Committee.

2. Protection Strategies:

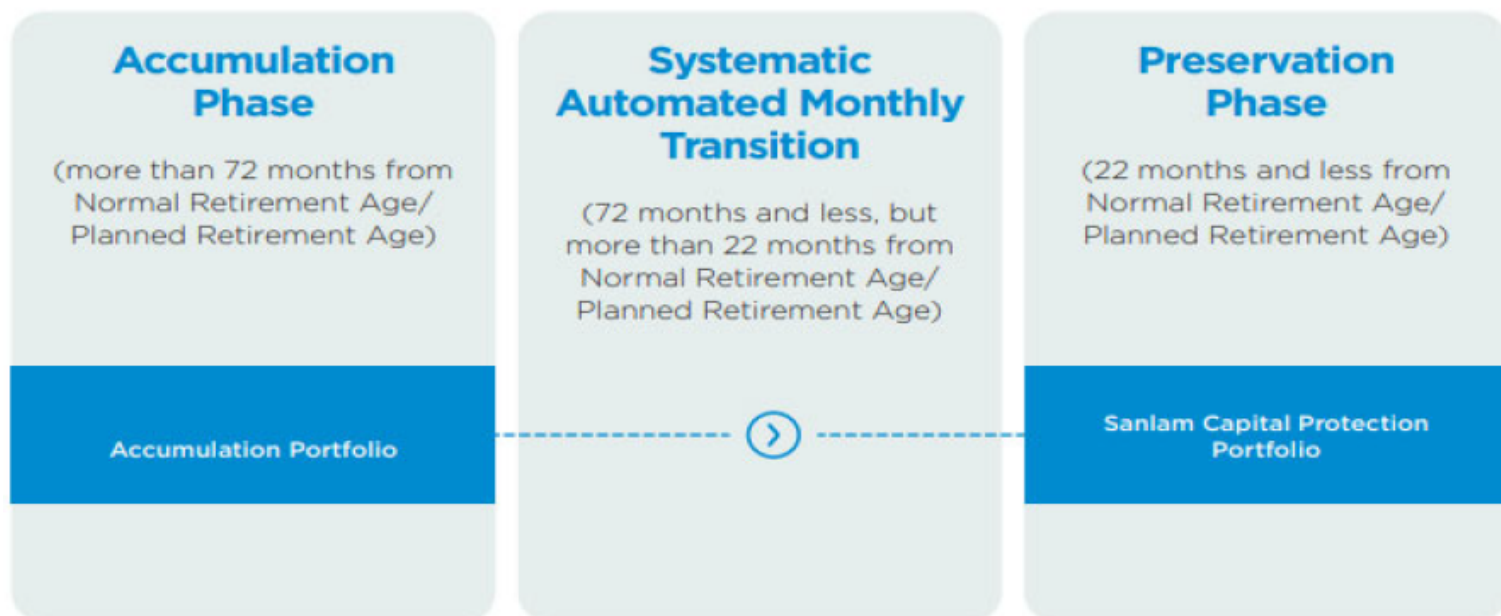

- **Sanlam Secure Strategy** - The Trustees have approved an alternative default investment strategy, suitable for members who wish to achieve inflation-beating real returns over the medium to long term, but who are particularly concerned against significant short-term investment losses. The strategy currently invests all contributions in the Sanlam Monthly Bonus Fund.
- **Sanlam Stable Strategy** - The Trustees have approved an alternative default investment strategy, suitable for members who wish to have exposure to the financial markets, while protecting themselves against adverse movements in the markets. The strategy currently invests all contributions in the Sanlam Stable Bonus Portfolio.
- **Volatility Protection Strategy** - The default investment strategy is suitable for members who wish to achieve inflation-beating real returns over the medium to long term, but who are particularly concerned about protecting against significant short-term investment losses. The Volatility Protection Strategy aims to invest 75% in the Sanlam Monthly Bonus Fund and 25% in the Satrix Enhanced Balanced Tracker Fund.

The performance of the portfolios selected will directly affect a member's eventual retirement benefit. The trustees regularly monitor the investment strategy and the investment choices on offer to ensure their appropriateness. A key part of this process is monitoring the performance of the portfolios selected and comparing it to the agreed investment benchmarks. The trustees appointed Simeka Consultants & Actuaries as investment consultants to assist them to monitor and manage the Funds' investments.

The role of the Joint Forum

Each participating employer is required to establish and maintain a Joint Forum. This is a representative forum with equal representation by member and employer representatives where retirement fund benefits are considered and agreed upon. This forum therefore ensures member participation in the decision making and monitoring processes. One of the most important roles of the Joint Forum is to consider the appropriateness and performance of the default strategy as selected. Note that the employer technically remains the contracting party who acts on the decisions taken at the Joint Forum.

Lifestage Strategy

Summary of Returns

	MRQ	1 Year	3 Years	5 Years	7 Years	10 Years

NOTES:

- The values above are estimated over a rolling 3 year period and annualized unless otherwise stated.
- Figures are lagged by three months.
- The highest fee tier (i.e. lowest asset size) is assumed in the TERs.
- Portfolios that are less than 6 months old, may not have underlying data available to calculate a reliable estimate.
- Where applicable asset consulting fees must still be added.
- TER Includes an investment administration charge of 0.173% (including VAT) for portfolios not wrapped in a Sanlam policy.
- Estimated assuming 75% in Monthly Bonus Fund and 25% in Satrix Enhanced Balanced Tracker Fund.
- The Orbis fees are included in the total TER and will no longer be disclosed separately under performance fees.
- Only available to clients with existing exposure
- The performance returns of the Financial Product are reported net of Trading Costs.

**Averaged as Pension and Provident Fund figures differ slightly
