Trustee Approved Default Investment Portfolios

Lifestage Strategies

How Lifestage Models works

The investment strategy consists of two phases and members are automatically switched from one phase to another as they near retirement. The two phases are:

- Accumulation phase
- Preservation phase

As retirement approaches, this target date strategy invests in an investment portfolio matching the member's postretirement needs or plans, but in the years prior to this greater emphasis is placed on achieving capital growth. Members with more than 6 years before reaching their Normal Retirement Age or Planned Retirement Age (if different) are fully invested in their chosen Lifestage Accumulation Portfolio which aims to achieve capital growth. Six years (72 months) before a member reaches his/her Normal Retirement Age or Planned Retirement Age (if different), the member is gradually switched from the Lifestage Accumulation Portfolio to the Capital Protection Preservation Portfolio by means of 50 monthly switches.

Sanlam Lifestage Strategy

The **Sanlam Lifestage Accumulation Portfolio** aims to provide market-related growth to members who are more than six years from retirement and who need to grow their retirement savings. The **Sanlam Accumulation Portfolio** allocates its assets across equity, bond, property, cash, hedge fund and international portfolios. In the case of each domestic portfolio a core/satellite investment strategy is employed. The core is a low cost index-tracking strategy, around which the satellite managers aim for active returns through the outperformance of their respective benchmarks. The portfolio has an aggressive risk profile.

Sanlam Blue Lifestage Strategy

The **Sanlam Blue Lifestage Accumulation Portfolio** aims to invest 50% in **Sanlam Multi Asset Growth Fund** and 50% in **SPW Balanced Fund**. Both portfolios invest in a wide spectrum of investments in equity, bonds, money and property markets in order to maximise total returns over the long term. By investing in a portfolio which diversifies across all the major asset classes, investors "outsource" the difficult decision of how much and when to invest in the different asset categories to Sanlam Investments. The portfolio is suitable for investors requiring capital growth via a moderate-aggressive risk balanced portfolio.

Sanlam Passive Lifestage Strategy

The **Sanlam Passive Lifestage Accumulation Portfolio** aims to provide high long-term investment growth. The underlying portfolio in this strategy is the **Satrix Enhanced Balanced Tracker Fund** and invests primarily in equities, property, fixed-interest investments, cash and foreign assets. Each of the underlying asset classes, except cash, is managed on a passive basis - in other words, by tracking an underlying index. Tactical asset allocation is also employed to enhance the performance of the fund relative to the performance of its benchmark. The portfolio has an aggressive risk profile.

Fund performance

| Accumulation Phase | 1 month | 3 months | 1 year | 3 years | 5 years |
|--|---------|----------|--------|---------|---------|
| Sanlam Accumulation Portfolio | 2.1% | 3.9% | 18.6% | 11.6% | 12.1% |
| Sanlam Blue Accumulation Portfolio | 2.0% | 3.3% | 13.6% | 10.0% | 10.1% |
| Sanlam Passive Accumulation Portfolio | 2.2% | 3.4% | 17.9% | 11.4% | 12.2% |
| Sanlam Wealth Creation Accumulation Portfolio | 2.0% | 3.3% | 16.4% | 11.4% | 13.2% |
| Preservation Phase | | | | | |
| Sanlam Capital Protection Portfolio | 0.9% | 2.7% | 11.1% | 9.3% | 8.3% |

Please note:

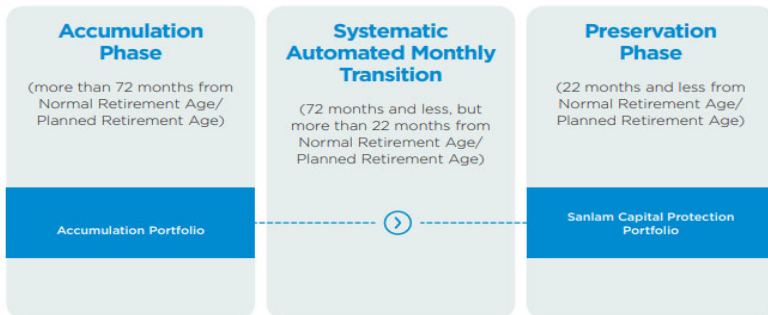

Sanlam Accumulation Portfolio investment reporting only commences from 1 August 2013, but the longer term performance was achieved applicable to members previously invested in the Accumulation Phase of the Sanlam Umbrella Fund's discontinued Lifestage Programme, and whose investments were transitioned to Sanlam Lifestage during the month of July 2013.

Sanlam Wealth Creation Lifestage Strategy

The **Sanlam Wealth Creation Portfolio** aims to deliver superior real returns over the long term. This balanced portfolio is managed in a multimanager basis and includes international exposure. Each manager has been selected on the basis of rigorous quantitative and qualitative analysis. The underlying managers of the portfolio have been selected, mandated, monitored and reviewed by a Joint Investment Committee.

Sanlam Capital Protection Portfolio

This portfolio was selected as the preservation strategy given its objective to protect the invested capital by guaranteeing the net contributions invested. The portfolio invests in the **Sanlam Stable Bonus Portfolio**. The Stable Bonus Portfolio provides investors with exposure to the financial markets, which provides investors with exposure to equity markets, but also protects them against adverse market movements. This is achieved by smoothing the returns over time and guaranteeing the net contributions invested together with the vested bonuses in case of resignation, retirement, death, retrenchment or disability. 38 Non-vested bonuses are also declared over and above the vested bonuses. These can be removed in very extreme circumstances though this has never yet occurred since the portfolio's commencement in 1986. The underlying portfolio has a diversified exposure to domestic equity, bonds, property and alternative investments as well as international assets. The portfolio has a conservative risk profile.

Note: Performance figures are gross of investment management fees, but are net of any performance fees (if applicable). For portfolios in the Smoothed Bonus Range the returns are gross of investment management fees, but are net of any guarantee premiums. Performance figures for periods greater than 12 months are annualised. All data shown is at the month-end, unless specifically indicated differently. Changes in currency rates of exchange may cause the value of your investment to fluctuate. Past performance is not necessarily a guide to the future returns. The value of investments and the income from them may increase or decrease and are not guaranteed. You may not get back the amount you invest. The product information sheets are prepared for the SANLAM UMBRELLA FUND by its investment consultants. The product information sheets are prepared in good faith and the information, data and opinions contained in the product information sheets are based on source information considered reliable. However, no guarantee, explicit or otherwise are provided that the information and data contained therein are correct and comprehensive. The SANLAM UMBRELLA FUND and the investment consultants cannot be held liable for any loss, expense and/or damage following from the use of the product information sheets.

Satrix Enhanced Balanced Tracker Fund

Period Ending 30-Nov-24
Fund Size R12 827 million
Inception Date Sep-08

Fund objective

The portfolio invests in tracker equity and bond indices, locally and abroad, and also cash to create a moderate risk balanced portfolio which is expected to perform close to the underlying indices without incurring active management costs. Scrip lending may be performed on the passive equity component.

Risk Profile

This fund has an aggressive risk profile

Fees

0.36% on both local and foreign assets per annum

The domestic equity component tracks the Capped SWIX Index. Script lending is permitted in respect of this basket of shares, and the resultant income (net of associated costs) is periodically rebated to clients participating in this portfolio, and effectively serves to reduce the quoted management fee.

Sanlam Multi Asset Growth Fund

Period Ending 30-Nov-24
Fund Size R1 153 million
Inception Date Nov-24

Fund objective

The fund's objective is to provide high long-term investment growth. It invests primarily in equities, property, fixed-interest investments, cash, and foreign equity. This portfolio makes use of different Sanlam building blocks to create a specialist portfolio which is exclusively managed by subsidiaries of the Sanlam Investment Group. The portfolio complies with the provisions of Regulation 28, issued under the Pension Funds Act (Act No. 24 of 1956), as amended.

Risk profile

The portfolio has a moderate-aggressive risk profile.

Note: Performance figures are gross of investment management fees, but are net of any performance fees (if applicable). For portfolios in the Smoothed Bonus Range, the returns are gross of investment management fees, but are net of any guarantee premiums. Performance figures for periods greater than 12 months are annualised. All data shown is at the month-end, unless specifically indicated differently. Changes in currency rates of exchange may cause the value of your investment to fluctuate. Past performance is not necessarily a guide to the future returns. The value of investments and the income from them may increase or decrease and are not guaranteed. You may not get back the amount you invest. The product information sheets are prepared for the SANLAM UMBRELLA FUND by its investment consultants. The product information sheets are prepared in good faith and the information, data and opinions contained in the product information sheets are based on source information considered reliable. However, no guarantee, explicit or otherwise are provided that the information and data contained therein are correct and comprehensive. The SANLAM UMBRELLA FUND and the investment consultants cannot be held liable for any loss, expense and/or damage following from the use of the product information sheets.

Protection Strategies

Sanlam Secure Strategy

The trustees have approved an alternative default investment strategy suitable for members who wish to achieve inflation-beating real returns over the medium to long term, but who are particularly concerned against significant short-term investment losses. The strategy will most likely result in lower returns than the Sanlam Lifestage over the long term as a consequence of the implicit cost of the underlying guarantees and lower effective equity exposure. Nonetheless, the trustees recognise that such a strategy is suitable for many members – particularly those members who are not financially sophisticated and who might not appreciate that a high equity exposure inevitably implies some risk of capital loss over the short-term. The strategy could be considered by investors preferring a cautious approach to month management; investors who require capital security and investors who regard financial security as highly important. The strategy currently invests all contributions in the **Sanlam Monthly Bonus Fund**.

Sanlam Stable Strategy

The trustees have approved an alternative default investment strategy, suitable for members who wish to have exposure to the financial markets, while protecting themselves against adverse movements in the markets. This is achieved by smoothing the returns over time, and guaranteeing (for resignation, retirement, death, retrenchment and disability events) the net contributions invested together with the vested bonuses. Non-vested bonuses are also declared on top of that. These can be removed in very extreme circumstances though this has never yet occurred since the portfolio's commencement in 1986. The strategy could be considered by investors preferring a cautious, arm's-length approach to money management; investors wishing to avoid any chance of losing money; investors who require capital security and investors who regard financial security as highly important. The strategy currently invests all contributions in the **Sanlam Stable Bonus Portfolio**.

Volatility Protection Strategy

The default investment strategy is suitable for members who wish to achieve inflation-beating real returns over the medium to long term, but who are particularly concerned about protecting against significant short-term investment losses. The strategy will most likely result in lower returns than the four Lifestage strategies over the long term as a consequence of the implicit cost of the underlying guarantees and lower effective equity exposure. Nonetheless, the trustees recognise that such a strategy is suitable for many members – particularly those members who are not financially sophisticated and who might not appreciate that a high equity exposure inevitably implies some risk of capital loss over the short-term. The trustees review the investment strategy of the Volatility Protection Strategy continually, and will make periodic changes to the underlying investments in line with the objectives of the strategy. The Volatility Protection Strategy aims to invest **75% in the Sanlam Monthly Bonus Fund and 25% in the Satrix Enhanced Balanced Tracker Fund**.

Fund performance

| Phase | 1 month | 3 months | 1 year | 3 years | 5 years | 10 years |
|---------------------------------------|---------|----------|--------|---------|---------|----------|

Sanlam Monthly Bonus Fund

Period Ending 30-Nov-24
Fund Size (Book Value) R9 296million
Inception Date Jul-99

Fund objective

The Monthly Bonus Fund (MBF) protects investors against short-term volatility by smoothing out investment returns, whilst providing valuable guarantees on benefit payments. The underlying portfolio is mandated with more weight to less risky asset classes than a typical balanced fund. The Sanlam Monthly Bonus Fund offers 100% capital guarantee and fully vesting bonuses. Fully vesting bonuses are declared monthly in advance.

Satrix Enhanced Balanced Tracker Fund

Period Ending 30-Nov-24
Fund Size R12 827 million
Inception Date Sep-08

Fund objective

The portfolio invests in tracker equity and bond indices, locally and abroad, and also cash to create a moderate risk balanced portfolio which is expected to perform close to the underlying indices without incurring active management costs. Scrip lending may be performed on the passive equity component.

Risk Profile

This fund has an aggressive risk profile

Fees

0.36% on both local and foreign assets per annum

The domestic equity component tracks the Capped SWIX Index. Script lending is permitted in respect of this basket of shares, and the resultant income (net of associated costs) is periodically rebated to clients participating in this portfolio, and effectively serves to reduce the quoted management fee.

Regulation 28 Compliance

All of the Trustee-approved institutionally priced portfolios are compliant with Regulation 28 .

The Sanlam Umbrella Fund Trustees are responsible for ensuring compliance with Regulation 28 of the Pension Funds Act, and no monitoring is required at Participating Employer level. The Trustees will take whatever steps are necessary to ensure ongoing compliance with Regulation 28 including the possibility of making changes to the Fund's investments, for example closing non-compliant portfolios to new inflows, as permitted in terms of the approved Investment Protocol.

Sanlam Multi Asset Growth Fund

Period Ending 30-Nov-24
Fund Size R1 153 million
Inception Date Nov-24

Fund objective

The fund's objective is to provide high long-term investment growth. It invests primarily in equities, property, fixed-interest investments, cash, and foreign equity. This portfolio makes use of different Sanlam building blocks to create a specialist portfolio which is exclusively managed by subsidiaries of the Sanlam Investment Group. The portfolio complies with the provisions of Regulation 28, issued under the Pension Funds Act (Act No. 24 of 1956), as amended.

Risk profile

The portfolio has a moderate-aggressive risk profile.

Satrix Enhanced Balanced Tracker Fund

Period Ending 30-Nov-24
Fund Size R12 827 million
Inception Date Sep-08

Fund objective

The portfolio invests in tracker equity and bond indices, locally and abroad, and also cash to create a moderate risk balanced portfolio which is expected to perform close to the underlying indices without incurring active management costs. Scrip lending may be performed on the passive equity component.

Risk Profile

This fund has an aggressive risk profile

Fees

0.36% on both local and foreign assets per annum

The domestic equity component tracks the Capped SWIX Index. Script lending is permitted in respect of this basket of shares, and the resultant income (net of associated costs) is periodically rebated to clients participating in this portfolio, and effectively serves to reduce the quoted management fee.

Allan Gray Global Balanced

Period Ending 30-Nov-24
Fund Size R33 328 million
Inception Date Aug-00

Fund objective

This Portfolio is for institutional investors with an average risk tolerance. It aims to offer long-term returns superior to the benchmark, but at lower risk of capital loss.

Risk Profile

This fund has a moderate-aggressive risk profile.

Fees

Allan Gray Global Balanced**

On local assets:
 1.00% per annum ***

On foreign assets:
 The Base Refundable Reserve Fee (RRF) levies a base fee of 0.60% p.a. plus 25% of the outperformance (net of the base fee) experienced relative to its benchmark, subject to a refund for subsequent underperformance. The maximum fee (base plus performance fee), that Orbis can receive in cash in any one year is limited to 2.6%. The benchmark for the Selection (Base RRF) is 60% of the MSCI World Index (net dividends reinvested) and 40% of the JP Morgan Global Government Bond Index.

** This portfolio is not wrapped within an insurance policy issued by Sanlam and is charged an investment administration fee of 0.15% (excluding VAT) per annum.

***Allan Gray Global Balanced (closed) is the identical portfolio only available to participating employers invested in this portfolio prior to 1 March 2015. A lower fee of 0.65% per annum applies on local assets.

Risk analysis

(based on the last 3 years' monthly returns)

| | |
|---|-------|
| % of negative months over the last 3 years | 30.6% |
| Average capital loss in one month | -2.3% |
| Downside risk * | 6.2% |

* Downside risk is measured as the standard deviation of the underperformance of the portfolio relative to CPI

Note: Performance figures are gross of investment management fees, but are net of any performance fees (if applicable). For portfolios in the Smoothed Bonus Range, the returns are gross of investment management fees, but are net of any guarantee premiums. Performance figures for periods greater than 12 months are annualised. All data shown is at the month-end, unless specifically indicated differently. Changes in currency rates of exchange may cause the value of your investment to fluctuate. Past performance is not necessarily a guide to the future returns. The value of investments and the income from them may increase or decrease and are not guaranteed. You may not get back the amount you invest. The product information sheets are prepared for the SANLAM UMBRELLA FUND by its investment consultants. The product information sheets are prepared in good faith and the information, data and opinions contained in the product information sheets are based on source information considered reliable. Truffle Balanced Fund

Period Ending 30-Nov-24
Fund Size R11 445 million
Inception Date Oct-11

Fund objective

The portfolio is suitable for investors requiring moderate levels of capital growth who do not wish to make complex asset allocation decisions between equities, cash and bonds, both locally and offshore. Diversification across asset classes and a maximum equity exposure of 75% helps to reduce risk and volatility relative to a general equity portfolio.

Risk Profile

This fund has a moderate-aggressive risk profile.

Fees

Truffle Balanced Fund**

0.75% on both local and Foreign assets.

** This portfolio is not wrapped within an insurance policy issued by Sanlam and is charged an investment administration fee of 0.15% (excluding VAT) per annum.
